*Required information

(Before handing over the bike to the service, it is necessary to always have all mandatory information filled in!)

Advice and tips

Turning on the e-bike

- Always turn on the electric bike when it is at rest.
- Activate the battery with the button on the frame
- After 2 seconds, turn on the display by holding down the appropriate button (approx. 5 seconds)

Common mistakes when starting an electric bike

E001/E01

Solution: take your foot off the pedal and restart the entire system

Other tips (electric bike and bicycle):

- Shifting while driving: apply pedal pressure -> engage gear -> gradually increase pedal pressure
- Charge the battery after each ride at 100%.
- If the bike is idle, charge the battery to 100% once a month
- Do not interrupt the charging cycle unnecessarily
- If possible, charge the battery on the bike
- Store the battery at a temperature higher than 7 degrees Celsius
- Maintain regular pre- and post-season services
- Keep the bike clean.
- Never wash the bike with a high-pressure washer (water jet).
- Store the bike in a dry and clean environment
- Detailed instructions and error messages can be found at www.leaderfox.cz
